

Long Term Technical Committee 2016-2017

Happenings in the Photography West Camera Club:

For the past 4 months a committee of 6 photo members formed the **Long Term Technical Committee**. They have been meeting to produce a process for requests for the photo board of directors. This process involved research on the history of past large equipment purchases, inventory of equipment, how to better assist the board before a decision is made and a process for members to present new ideas and interests to the board.

The outcomes of this committee have produced a *new* policy for requesting space or money along with new ideas for the Club. This paper form will be posted on the photo website and also placed in the metal cabinet for easy access to members. Any photo member may make a request to the committee which will follow the procedure below:

Step 1. A member must fill out the request form to be presented to the Long Range Tech committee for review.

Step 2. The committee will evaluate the request as to its impact on current equipment, cost involved, and how it fits with the current programs for the membership.

Step 3. The committee will make a recommendation to the board.

Step 4. The board will make the final decision to accept or reject the request.

Step 5. The board will submit requests over \$300 to the membership for a vote.

Step 6. The board president will submit requested budget for RCSCW decision when required by the RCSCW rules.

Please direct questions about this process to: co-chairs of the committee.
